## About CDC

---

Consultancy Development Centre (CDC) is an Autonomous Institution of the Department of Scientific and Industrial Research (DSIR), Ministry of Science and Technology, Government of India set up for promotion, development and strengthening of consultancy skills and capabilities in the country including enhancement of export of consultancy and professional services.

## About FEEV

---

Five Elements Environment Ventures Pvt. Ltd. believes in the concept of the balance among the five elements that forms the base for all the activities of the nature. FEEV provide sustainable solution through their services in the field of consultancy, research & development activities and skill development programs.

FEEV is a provider of environment consultancy services to the environmental, waste and recycling sector, providing advices to a range of clients including waste producers, management industries, regulators and investors.

FEEV undertake the research based and capacity enhancement trainings and workshops under guidance of various ministries such as **Ministry of Urban Development, Ministry of Environment and Forest and Climate Change, Ministry of New and Renewable Energy, Government of India.**

FEEV is the Knowledge Management Partner Institution of CDC under the Programme “Building Capacities for Consultancy Development & Knowledge Management with Partner Institution (KMPI)” .

Under this programme, partner institutions/organisations undertake various activities of relevance to consultants, clients of consultancy and other stake holder in consultancy projects in association with CDC.

## About the Programme

---

Recycling of waste is necessary to set off the imbalance between limited natural resources and human material demand. The concept of circular economy emphasizes using resources as long as possible, to extract their maximum value. Recycling involves recovering and giving a purpose to the recovered resources. Hence education and awareness on recycling is must among government authorities and sustainability professionals. This session introduces to the participants to the recycling industry formal as well as the informal showing a picture of required setups to manage recovered resources.

Capacity development in the solid waste management sector is one of FEEV’s major activities. FEEV is developing various courses in collaboration with experts, institutes and private industries for enhancing capacities of the workforce to the solid waste management sector.

It is planned to organize series of detailed Programs on various aspects of Waste Management which would provide knowledge and solutions using real time case studies in effectively managing solid waste scenario in our country.

As a precursor to the above programme, this half day session is being organized to share with you our approach and observations from the field and also to take your inputs on how make the initiative more effective.

## Objectives

---

- Capacity development to enhance the capabilities of Government officials, Technocrats, Financial firms and Environmental Consultants
- Build capacities of consultants from specialised fields in solid waste management.
- Increasing capabilities of professionals to provide advisory services for preparation of technical, financial, policy implementation, strategic inputs for Solid waste management projects
